

The Energy Efficiency Movement (EEM): the global network for energy efficiency.

Purpose

Empowering the adoption at scale of energy efficiency within industry, to accelerate the world towards net zero.

IMPACTFUL

With 10 simple energy efficiency measures, we could save 4 metric gigatons of CO₂ emissions by 2030.

EASY

The technology enabling energy efficiency is already available.

PROFITABLE

Investing in energy efficiency could save Industry \$437 billion by 2030.

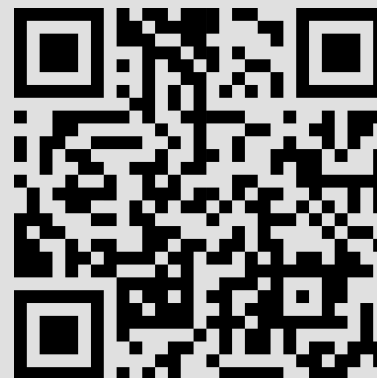

Mission

The Energy Efficiency Movement **accelerates** energy efficiency in industry.

More than **550 organizations** have joined.

FIND OUT MORE

Vision

We **empower** the industry to implement energy efficiency at scale. Our work rests on three pillars:

KNOWLEDGE

We share practical energy efficiency know-how and resources.

TRAINING

We enable professionals to gain energy efficiency skills.

COLLABORATION

We help organizations share best practices and collaborate.
